WORKERS' COMPENSATION PLAN

Protect Workers & Prevent the
Spread of COVID-19 on Job Sites

CREATE A PLAN!

Why Create A Plan?

Preventing the spread of COVID-19 will keep construction job sites open, help prevent delays, and protect employees.

The Center for Construction Research and Training provides a **FREE COVID-19 Exposure Control Planning Tool** that takes you step-by-step through developing your plan.

With 4 easy steps you will know what to consider when:

- Conducting a job hazard analysis for COVID-19
- Screening workers and visitors
- Selecting appropriate controls
- Training employees
- Implementing the plan

Remember to **take advantage of your employees' knowledge** of job site conditions as you develop your plan.

At the end of the steps, you will have a **written plan tailored for your job** that can be saved, printed, and emailed.

There is an option to confidentially register if you want to save and edit your plan(s) at a later time, but **registration is not required** to use this free tool.
