

The Group Self-Insured Workers' Comp Plan That **Pays You Back!**

You probably know that CAMComp is self-insured and member owned, but did you know we recently added some new services for our members? That's right. Services that help turn your policy premiums into an investment, not an expense!

These services help us establish and maintain members who prioritize safety first. In doing so, we have a much greater chance of lowering the injury & illness rate as a group. Which in turn, puts money back in your pocket!

As Michigan's leading self-insured group, we reward our members by paying them back for working safely. If premiums exceed claims, we pay that difference

plus investment income back to our group members.

So What Exactly Are These Services?

Pre-Qualification Review

This service allows us, as the provider, to ensure all companies interested in coming on board with us, have safety systems in place. We typically conduct this review via Zoom call to assess their Health & Safety Management System (SHMS). Depending on the nature and size of the organization, it could entail an in-person visit.

New Member Visit

This is my opportunity to reach out to the new members and welcome them to CAMComp. At this time, if I have not already performed a pre-qualification process, I ask about their Health & Safety Management System (SHMS) and offer any assistance needed.

Wellness Visit

For existing members, we offer extended Safety Services, such as; safety training on numerous topics, and our online CAMComp Safety Center. I am here to assist you with your health and safety questions when you need it most.

Participation Review

In the event that a member company's loss ratio exceeds 60% for 2 consecutive years or 100% within 3 years, we are alerted and immediately take action. As the Loss Control Consultant, I will reach out and set up an appointment for a Participation Review to identify risks and develop a plan of action to improve future safety outcomes.

Safety Training

Whether I come out to do forklift training for your workers, or provide outside resources and trainers to come in, we are here to help. All of us here at CAMComp, are dedicated to providing our members with everything they need to set up, manage and maintain a healthy and robust Safety Culture.

To schedule your Wellness Visit today, reach out to me, CAMComp's Loss Control Consultant:
